FILEZILLA:

FileZilla is a free software, cross-platform SFTP application, consisting of FileZilla Client and FileZilla Server. Filezilla is open source software distributed free of charge.

1.   FileZilla will need to be downloaded in order to connect to the SFTP site.
         To Download Filezilla, type (or copy) in your search bar:
         https://filezilla-project.org/

         Follow the instructions to download the free software to your computer.

2.   When ready to **connect** to the SFTP Filezilla site for downloading files:
         -        Click on "File";
         -        Select "Site Manager";
         -        Click on the "New Site" button;
         -        Enter the following information on the "General" tab to connect:
                  *   Host: **167.10.5.139;**
                  *   Protocol: **SFTP – SSH File Transfer Protocol**;
                  *   Login Type: **Normal;**
                  *   User: **AGXFER102** (Not Case Sensitive);
                  *   Password: **6oZi1DFduVyXZa**
                  *   Port: **22**
